

## PROFILE

An innovative, dedicated and efficient web developer with solid experience in utilising Javascript, HTML and CSS to deliver exceptional client and user experiences.

A collaborative work style, with the ability to analyse client requirements, provide technological understanding through knowledge sharing and effective communication, and develop and create custom built websites and apps with a focus on customer interface and sales conversion.

A good eye for design and usability and the capacity to implement new services and features with an emphasis on clean and maintainable code quality, and incorporating the consideration of SEO.

Well organised, comfortable working on multiple projects simultaneously, deadline driven and passionate about impacting a client's digital business.
